What is Emsi Data?

Emsi data is a hybrid dataset derived from official government sources such as the US Census Bureau, Bureau of Economic Analysis, and Bureau of Labor Statistics. Leveraging the unique strengths of each source, our data modeling team creates an authoritative dataset that captures more than 99% of all workers in the United States. This core offering is then enriched with data from online social profiles, resumés, and job postings to give you a complete view of the workforce.

Emsi data is frequently cited in major publications such as The Atlantic, Forbes, Harvard Business Review, The New York Times, The Wall Street Journal, and USA Today.

Workforce Map

Executive Summary

Aggressive Hiring Competition Over a Deep Supply of Regional Talent

Supply (Jobs)

Your area is a hotspot for this kind of talent. The national average for an area this size is 34,283* employees, while there are 42,266 here.

Compensation

The cost for talent is about average in your area. The national median salary for your occupations is \$37,843, while you'll pay \$36,571 here.

Demand (Job Postings)

Competition from online job postings is high in your area. The national average for an area this size is 513* job postings/mo, while there are 607 here.

*National average values are derived by taking the national value for your occupations and scaling it down to account for the difference in overall workforce size between the nation and your area. In other words, the values represent the national average adjusted for region size.

Supply (Jobs)

Supply Is Higher Than the National Average

The regional vs. national average employment helps you understand if the supply of your occupations is a strength or weakness for your area, and how it is changing relative to the nation. An average area of this size would have 34,283* employees, while there are 42,266 here. This higher than expected supply may make it easier to find candidates. The gap between expected and actual employment is expected to remain roughly the same over the next 5 years.

^{*}National average values are derived by taking the national value for your occupations and scaling it down to account for the difference in overall workforce size between the nation and your area. In other words, the values represent the national average adjusted for region size.

Most Jobs are Found in the Motor Vehicle Manufacturing Industry Sector

Place of Work vs Place of Residence
